WITKOWITZ
ENVI

ESG STATEMENT 2025

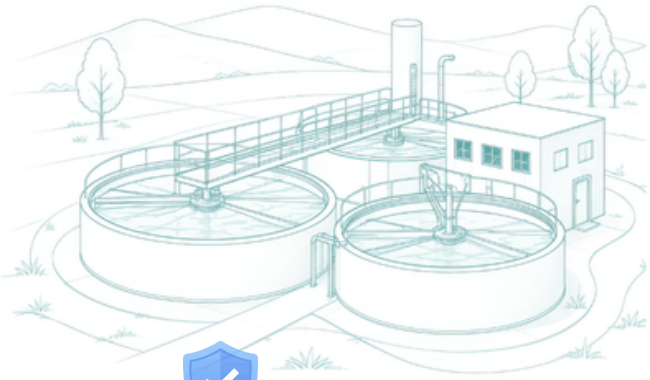

The year 2025 is the first reporting period for which the company has systematically collected and compiled ESG information.

ABOUT THE COMPANY

WITKOWITZ ENVI a.s. is a manufacturing and technology company based in Ostrava, Czech Republic. It specializes in the production of enamelled, stainless-steel and powder-coated steel tanks, as well as technological units for water management, wastewater treatment plants, biogas plants and agriculture.

Our solutions contribute to environmental protection and the sustainable use of natural resources.

ENVIRONMENT

In the environmental area, we focus on the efficient use of energy and water, responsible management of waste and materials, and minimising the environmental impacts of our manufacturing processes.

Our approach also takes into account the long service life of our products and their potential for repair, refurbishment, dismantling and subsequent material recovery.

SOCIAL

Our employees are a key part of the company's know-how. We place emphasis on a safe working environment, professional competence and employee development.

We support education and vocational training and ensure compliance with occupational health and safety requirements.

GOVERNANCE

Responsible corporate management is based on our established quality, environmental and occupational health and safety management systems, as well as compliance with legal and other applicable requirements.

We focus on risk management, clearly defined responsibilities and authorities, supplier management, and ethical and responsible conduct.

CONCLUSION

ESG reporting is part of the company's responsible management approach and builds on its long-term values and strategy.

This statement provides a high-level overview of the company's approach to environmental matters, employees and responsible governance for 2025.
